

San Francisco Long Term Care Coordinating Council

At a Glance

The Long Term Care Coordinating Council (LTCCC) was created in 2004 to provide policy guidance to the mayor's office. The Council's mission is to advise, implement, and monitor community-based, long-term care planning; and to improve the coordination of home, community-based, and institutional services for older adults and persons with disabilities. LTCCC has 40 membership slots representing a variety of consumers, advocates, and service providers. Additional representation is from city and county departments including: Aging and Adult Services, Public Health, Mayor's Office on Disability and Housing, San Francisco Housing Authority, and the Municipal Transit Authority. LTCCC focuses on how service delivery systems interact to serve people, and recommends ways to improve service coordination and system interaction.
